"God Made the Newspapers."

Rev. Dr. William A. Gardner's Ringing Words on the Press.

GREATER THAN THE PREACHERS.

There are folks in newspapers as in the Book of Nature, and a wise man should learn the fifth of Proverbs as he would learn the Book of Nature.

Rev. Dr. William A. Gardner, pastor of the West Side Christian church, last night preached a sermon on "Our Daily Newspapers." The church was filled to overflowing.

"Let me explain," he said, "that I do not know of the 'indies' movement, to purify the press when I proposed the sermon. I am about to preach, and I will handle the subject more fully on November 12th as the ladies have requested."

Without further introduction Dr. Gardner said that he had addressed a letter to every newspaper in San Francisco, in which he asked the following questions: "What is your average daily circulation, the average cost of each issue, the average day's compensation, and the average day's work?"

He said he had found that the six daily papers of San Francisco had a circulation ten times greater than all the congregations preached to by all the ministers of the city.

"There is nothing in all the range of literature as common as the daily paper, the library of the masses of our people. It is the faithful messenger that keeps us constantly in touch with all the world. We read it in our homes, on the street car, in the office and behind the counter. Upon the streets of all our great cities there is nothing more common than the cry of the newspaper boy. 'The paper, sir, all about the great fire.' 'Express, sir, all about the great railroad accident.' And you forget about hard times and buy a paper, reasoning to yourself that you might as well be out of the world as to be without the news."

"There are few, if any, tellers who work as hard for the paper as the army of men and women who furnish us with our daily papers. I have sometimes felt the blood rushing to my temples as I have read the butchery enacted by reporters or typewriters upon the language used by me, but when I remember that a large amount of their work is done in the night and many times surrounded by a score of sleeping circumstances, my anger is turned to compassion, and I marvel that I am not more severely misrepresented. I am sure the average man does not feel as grateful as he should to the printer for the manifold blessings he receives at his hand, and I am glad to say that I have no complaint to offer, but much gratitude to express for the many courtesies extended and for the services rendered me by the daily press, through the kindness of the business managers of our papers and other sources at hand I was enabled during the past week to gather the facts from which to make the following approximate estimate concerning the daily press of this city.

"The number of papers circulated each day is 200,000; number of people receiving all their time 1,500,000; number of employees, including agents, reporters, etc., 2,500; average daily expenses, \$10,000; four-fifths of which is paid directly to employees. Over \$30,000 a week, or \$200,000 a year, is distributed among the 8,000 persons (including the families of the employees) who are in some way connected with the daily papers of our city. The preachers of San Francisco preach twice a week to not more than 20,000 people, while the daily press speaks seven times each week to not less than 100,000 in the city and state.

"There is much power in the pulpit and it has a great influence with the people, but how much greater the power of the daily press. May God hasten the day when it shall always be used to promote purity, righteousness and true reform.

"One of the chief objects I had in view in preparing this address was to suggest to you the proper use of the daily paper. A very intelligent man once said to me, 'The best use to make of the daily paper is to kindle the fire with it before it is read; but of course a fanatic.' It is here, with all its imperfections and it will stay. We cannot do without it. It will be purified as the people demand it. It contains many things with which I am not well pleased. I wish they were not there, for I believe them poisonous to the mind and destructive to spiritual life.

"There is another composition I have been studying for over forty years. I also find many things there I do not like. It is the Book of Nature. I could understand why its editor had placed in its columns poison oak, Canada thistles, rattlesnakes, cyclones, and a thousand other things that are poisonous or destroy life, but they are there and will never induce me to condemn the editor or his book, but I am determined to use my influence in getting rid of all the evil I can and make the best possible use of the good I find there. I pursue the same course with the daily paper.

"When you go to the restaurant for dinner, you do not attempt to eat everything mentioned on the bill of fare, even if you get it all at the same price you pay for one article; neither do you try to satisfy your appetite by partaking entirely of vinegars or peppercorns. They are good for spicy, but are not wholesome in large quantities. You should exercise the same judgment when you read your daily paper. A lady once told me that her husband sat down each morning after breakfast and read everything in his daily paper, even to the advertisements, but he was a swinish gourmand. More common sense should be exercised. Read that which will help you, make you stronger, better and happier. Do not set down to a feast of suicide, murder and divorce cases.

"Let me look over the shoulder of a night.

Tell your Landlady to use CLAIRETTE SOAP FOR COLLARS AND CUFFS.

It is the proper thing, ye know my dear boy.
